

Health Data Management

Daniels Memorial Healthcare Center is dedicated to helping improve your overall health care experience by providing convenient, streamlined resources to help you better manage your health. We now offer the ability for you to securely connect some of the health management apps you may use (i.e. fitness trackers, dietary trackers, etc.) to your health record

This new process provides access to your health and wellness data that will enable you and your care team to make informed choices. If you are interested in this opportunity, let us know by contacting Janelle Handran at 406-487-2337.

Once we receive your request, Daniels Memorial Healthcare Center will work with the appropriate vendors to determine if they meet the technical requirements in order to establish a secure connection.

Daniels Memorial Healthcare Center will continue to offer Cerner Health Patient Portal, our secure online application that allows you to:

- View lab results and other relevant health documents
- Send secure messages to your care team
- View your medications

At Daniels Memorial Healthcare Center, we're focused on enhancing your overall patient experience.
